Application Instructions

Surface Preparation

The backing surface must be sound, clean and free from any trace of oil or paint. The surface should be dampened a few hours before application of **SOPRA**Tile.

Mixing

Add 4-5 litres of clean water per 25 kg of **SOPRA** Tile powder and mix until a uniform, lump-free consistency is achieved. Leave the mix to stand for 10 minutes, then stir it before use.

Application

Spread mixed **SOPRA**Tile on to the surface to a uniform thickness of 3-4 mm. then comb horizontally. Place tile firmly on to the adhesive bed ensuring good contact with a twisting motion. Apply mixed **SOPRA**Tile up to a working area of not more than one square metre at a time. Joint grouting with **SOPRA** Joint Grout should be carried out after 24 hours.

Precautions

Health and Safety

SOPRATile is non-hazardous. It should not be swallowed or allowed to come into contact with skin or eyes. Suitable protective goggles and gloves should be worn. In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice. When contact with the skin is made, wash off immediately with soap and water. If swallowed, seek medical attention immediately, do not induce vomiting.
