

SOPRA Tile Paste

Ready to Use Tile Adhesive Paste

Description

SOPRA Tile Paste is a ready to use pre-mixed tile adhesive for fixing ceramic wall, floor and expanded polystyrene tiles. It is also suitable for damp and totally submerged conditions. The product is composed of selected binders, special fillers, additives and fungicide.

Uses

Fixing of ceramic wall and floor tiles in bathrooms, kitchens etc. on surfaces like bricks, plaster rendering, glazed bricks, asbestos sheeting, plywood and gypsum boards.

Advantages

- * Ready to use, no mixing involved.
- * Economical
- * Good adhesion properties.

Standard Compliance

BS 5980 Type 2, Class B

Packaging

6 kg or 25 kg pails.

Storage

6 months storage life when stored sealed unopened containers at below 25°C.

Properties

Form	Viscous Paste
Colour	White
Density @ 25 °C, kg / l	1.7
Coverage, kg/m ² @2 mm thickness	2

Application Instructions

Surface Preparation

The backing surface must be sound, clean and free from any trace of oil or paint.

Application

Apply **SOPRA** Tile Paste on the substrate up to a depth of 3mm, working in areas of one square meter at a time. Form horizontal ribs in the adhesive using notched trowel. Beginning at the top or bottom, press the tiles in twisting action and wipe off surplus adhesive with a damp cloth. Complete each square meter in this way. If the adhesive is spread over a large area at once, skinning might occur and cause adhesive failure. Joint grouting with **SOPRA** Joint Grout can start 24 hours after using **SOPRA** Tile Paste.

Precautions

Health and Safety

SOPRA Tile Paste is non-hazardous. It should not be swallowed or allowed to come into contact with skin or eyes. Suitable protective goggles and gloves should be worn. In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice. When contact with the skin is made, wash off immediately with soap and water. If swallowed, seek medical attention immediately, do not induce vomiting.
